

Fireproof filing cabinets series SV

The SV series is a modern range of high-quality cabinets with an outstanding finish, designed to protect suspension folders against fire.

These cabinets are powder-coated in RAL 9002. Easy to place in the office thanks to small dimensions and the extra low weight.

The drawers can be pulled out easily on slide rails fitted with ball bearings. Each drawer is insulated separately and only one drawer at a time can be pulled out, to eliminate the risk of the cabinet tipping over.

Central locking to lock one or more drawers at the same time. Tested and classified 60P or 120P according to NT Fire 017.

SA990

The same cabinet as the SA580, although this one is deeper so you can use it to store folders in double rows – so you get double the capacity.
 Dimensions, mm int/ext:
 • height: 1780/1900
 • width: 900/1050
 • depth: 570/710
 Weight: approx. 460 kg.
 Volume: approx. 990 l.
 Can accommodate 150 x A4 folders

Tested, approved and certified by SP to fire class 60 P according to NT Fire 017.

Practical accessories

Lots of practical accessories makes these cabinets easy to adapt to suit your business.

Pull-out drawer

Hanging folder frame

Our fireproof cabinets are, of course, tested and certified for protection of documents in the event of a total fire. However, they have also been developed to act as a natural storage location for all the times there is no fire.

Fireproof storage is a simple procedure. By using the cabinet as the natural storage place, you ensure the safety of important documents 24 hours a day. Convenience when you are at work. Protection when you leave for the day.

This solution is flexible and it gives your office the opportunity to change, to grow, to move.

Swedish design. Swedish manufacture.

At Secura, we work close to our own market in all aspects. A product designed to work as effectively as possible in modern office environments and shops is created right from the drawing board stage. Design, development and manufacture all take place in our modern plant in Bollnäs. This means fast and eco-friendly distribution on the European market.

Compact storage.

SA series models can be positioned in compact trolleys. This is an excellent way to store large numbers of documents in a small area and to keep them readily accessible.
